## DETAILED ACTION

### *Information Disclosure Statement*

1. The information disclosure statements filed 3/15/2002, 5/10/2002, 5/29/2002, 10/24/2002 have been considered.

### *Double Patenting*

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-30 stand provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-55 of copending Application No. 09/448,463 and as being unpatentable over claims 1-6, 19-30 of copending Application No. 09/448,756. Although the conflicting claims are not identical, they are not patentably distinct from each other because both of the inventions disclose a driver circuit for driving the active matrix circuit wherein the driver circuit and active matrix circuit comprising a plurality of thin film transistors of the same conductivity type. Application No. 09/448,463 and Application No 09/448,756 do not recite a plurality of pixels defined by the first lines and the second lines and a plurality of pixel

Art Unit: 2826

electrodes provided at the pixels. However, it would have been obvious to one of ordinary skill in the art to form the active matrix display device having a plurality of pixels defined by the first lines and the second lines and a plurality of pixel electrodes provided at the pixels, because such structure is conventional in the art for forming the liquid crystal display device.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

### ***Response to Arguments***

3. Applicant's arguments filed 10/24/2002 have been fully considered but they are not persuasive.

Applicant's claims 1-30 stand provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-55 of copending Application No. 09/448,463 and as being unpatentable over claims 1-6, 19-30 of copending Application No. 09/448,756, because the Terminal Disclaimer has not been submitted.

### ***Conclusion***

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
